FACT HUNGER

mand is for nourishment; our second for facts.

All through life we go about searching for information.

We make a new acquainte but before we will accept him as a friend or invite him to our home we ask for facts about him.

We visit a foreign land; and from the moment we step across its searching for facts.

We are asked to try a new food product; isn't it instinctive with us to ask at once:

- "Who makes this new article?"
- "How is it made? what goes into it?"
- "Is it worth the price charged for it?"

Facts-we are simply hungry for them.

Strange, im't it, that we should so often have to search for them? Odd, that some manufacturers still withhold the facts about their product. Not always because they are facts to be ashamed of—for there are many worthy articles yet unadvertised.

But it will not be so much longer. The fact-hunger of the human race is becoming keener and keener. The more facts we get, the keener our relish for more of them.

Soon it will be impossible to sell a man or a woman anything until everything has been told about the goods that can be told through Advertising.
